BTSA, using TOCOBIOL® as base product, has developed a wide range of natural and semi-natural antioxidants, always seeking greater efficiency in each and every one of their applications. The use of antioxidants as technological adjuvants reduce the natural effect of oxidation, slowing down rancidity and improving effectiveness over time.

TOCOBIOL®

It is unique for its antioxidant properties and its active ingredients naturally present in the product.

100% natural, TOCOBIOL® is the best and most effective way to protect food preparations against rancidity and to protect the active ingredients they contain.

MAIN ADVANTAGES

- + NATURAL ORIGIN
- + HIGH ANTIOXIDANT POWER
- + STABLE AT HIGH TEMPERATURES
- + HIGH AVAILABILITY OF PRODUCT
- + PRICE STABILITY
- + AVAILABLE IN SOYBEAN AND SUNFLOWER BASE
- + LIQUID AND POWDER FORM

TOCOBIOL® MIXTURES

Range of TOCOBIOL® based antioxidants that combine different natural and synthetic active ingredients, looking for a synergistic effect that enhances the activity of TOCOBIOL® as an antioxidant, while recovering TOCOBIOL® activity by a red-ox reaction in dietetic preparations.

MAIN ADVANTAGES

- + NATURAL ORIGIN
- + MAXIMUM ANTIOXIDANT POWER
- + SOLUTIONS TAILORED TO THE NEEDS OF EACH CLIENT
- + EFFECTIVE AT LOW CONCENTRATIONS
- + COST EFFECTIVE
- + AVAILABLE IN SOYBEAN AND SUNFLOWER BASE

NUTRABIOL® T

Mixed tocopherols that give stability to fat and oils susceptible to rancidity.

Our mixed tocopherols ensure increased food shelf life and reduce the risk of oxidation.

It is shown that mixtures α , β , γ and δ of NUTRABIOL® T are more active and more efficient than individual isomers.

MAIN ADVANTAGES

- + NATURAL ORIGIN
- + EUROPEAN QUALITY
- + AVAILABLE IN DIFFERENT CONCENTRATIONS
- + MORE EFFECTIVE THAN INDIVIDUAL ISOMERS
- + AVAILABLE IN SOYBEAN AND SUNFLOWER BASE

BTSA's wide range of active ingredients, provide high technology solutions based on natural and stable products for a secure and easy incorporation into any kind of formulation for dietetic and nutrition.

NUTRABIOL® E

Nutrabiol® E is the natural Vitamin E (d-alpha-tocopherol) of BTSA. With European quality, improves its performance by having a higher bioavailability than synthetic Vitamin E. We have different concentrations and international units, as well as products in liquid, powder, oil soluble or water dispersible form.

MAIN ADVANTAGES

- + NATURAL VITAMIN E (D-ALPHA TOCOPHEROL)
- + AVAILABLE IN DIFFERENT CONCENTRATIONS (IU)
- + ABSORBED AND RETAINED IN HUMAN TISSUES
- + HIGHER BIOLOGICAL ACTIVITY THAN DL-ALPHA TOCOPHEROL
- + AVAILABLE IN LIQUID AND POWDER FORM

ECOFLAX®

Flaxseed oil rich in Omega 3 (ALA). Available in microemulsified products, in water dispersible or oil-soluble format, both liquid and powder forms, which are stabilized using our own natural antioxidants.

MAIN ADVANTAGES

- + VEGETAL ORIGIN
- + MORE THAN 50% ALA
- + KOSHER CERTIFICATE
- + AVAILABLE IN LIQUID AND POWDER FORM

BIOMEGA-TECH® FISH

Fish oils rich in Omega 3 (EPA, DHA). We have microemulsified products, water dispersible, oil-soluble in both liquid and powder, which are stabilized using our own natural antioxidants.

MAIN ADVANTAGES

- + STABILIZED OILS
- + AVAILABLE UP TO 90% EPA (TG OR EE)
- + AVAILABLE UP TO 80% DHA (TG OR EE)
- + AVAILABLE IN LIQUID AND POWDER FORM

BIOMEGA-TECH® ALGAE

Algae oil rich in DHA (Omega 3). It is the best vegetal alternative to fish oils due to its high content of DHA. Complies with European Novel Food Legislation.

MAIN ADVANTAGES

- + VEGETAL ORIGIN
- + MINIMUM 40% OF DHA
- + KOSHER CERTIFICATE
- + NOVEL FOOD

PREMIXES

Vitamin and Mineral Premixes from LycoRed Ltd. Working hand in hand with our clients we can provide solutions to your needs quickly and efficiently. LycoRed Ltd., based on technological innovation as the microencapsulation, has developed a number of technical solutions for the enrichment of a wide variety of foods and beverages.

SQUABIOL®

Olive oil extract rich in squalene (minimum 75%). It is the vegetable alternative to animal-based squalene and is used as a nutritional supplement to reduce cholesterol and strengthen the immune system.

NATURAL COLOURS

Natural Colours and Pigments from Food Ingredient Solutions LLC. We have a wide range of natural colours for the food industry and for the different needs of each client, tailored to their manufacturing processes and all type of food applications. Our colours are used primarily to improve and standardize the colour and appearance of products or to restore the lost colour during the production process.

MAIN COLOURS

- + COPPER CHLOROPHYLLIN
- + ANNATTO
- + CARMINE
- + BETA CAROTENE
- + NATURAL PIGMENTS
